Leaf Sort

Goal: To sort by attribute.

You will need:

- Leaves
- A piece of paper divided into sections or a muffin tin in which to sort the leaves

What to do:

- Collect an assortment of different leaves.
- Sort the leaves. First sort them by size. Second, sort them by color. Third, short them by shape.
- Think of other ways to sort the leaves.

Alternatives:

- Use the leaves to make a picture. Glue them onto a piece of paper when you're satisfied with your design.
- Make a stack of leaves that all have a common attribute. Count the leaves in the stack. How many are there?
- Try this activity with objects other than leaves.
